

## How to Make Your Own UNE Moodle iPad Shortcut

This step-by-step guide will show you how to create a shortcut to the UNE Moodle site on your iPad that looks like and sits alongside your regular apps. This can be a helpful way to stay up to date with your UNE course materials and information, as well as a way to interact with peers in a more portable format than your regular computer.

1) Open the **Safari** App.

2) At the top of the screen, type in the address of the UNE Moodle website:

**moodle.une.edu.au**

3) Tap the **arrow icon** directly next to where you entered the address.

4) From this list, select '**Add to Home Screen**'.

5) The UNE logo should now appear. Press the blue '**Add**' button to add this icon.

6) A UNE Moodle shortcut should now appear on your iPad's home screen. By clicking on this shortcut, you will be taken directly to the UNE Moodle site for you to log in.
