

Arterial Doppler right leg report

DATE: 12 / 06 / 2018
PATIENT: Wendy Butterworth
DOB: 15 March 1946

PAGE:
REF:

CLINICAL NOTES:

Ulcer on anterior lower leg. Non-healing. ? arterial disease as cause.

DIAGNOSIS:

Ultrasound assessment of the arteries in the right leg showed non-significant arterial disease. The common femoral, profunda femoris, superficial femoral and popliteal arteries were patent with only minor plaques. There was a <50% stenosis in the proximal popliteal artery. Nil other arterial disease noted.

Sign

Electronically signed
