Dear Doctor,

Re: Mr Jordan Fallon

Thank you for accepting to seeing Mr Fallon. He is a 35-year-old receptionist who is morbidly obese. He is 175cm tall and weighs 114kg, giving him a BMI of 37. Mr Fallon has made many attempts to lose weight, all of which have been unsuccessful.

Mr Fallon now suffers from OSA, T2DM and depression, for which he is using Metformin XR 1g nocte and Sertraline 100mg mane.

I would like to refer him onto you for further investigation and possible gastric sleeve surgery if you feel this is appropriate.

Thank you,

Gerard Townsend
