

Head, neck and chest CT report

DATE: 04 / 06 / 2018
PATIENT: Jackson Hamilton
DOB: 20 Jan 1990

PAGE:
REF:

CLINICAL NOTES:

High Speed MVA. Car vs. tree 100km/hr. LOC at scene.
?intracranial bleed
?cervical spine fracture
?rib fractures / intrathoracic pathology.

DIAGNOSIS:

There is no evidence of intracranial pathology.
There is no evidence of a cervical spine fracture.
No evidence of traumatic aortic injury. No mediastinal
haematoma. There is evidence of a left pulmonary contusion as
well as left rib fractures. This is consistent with a
radiographic flail chest. A small amount of subcutaneous
emphysema is also noted around the fractured area.
