REF:

CLINICAL NOTES:

Histopathology of left mastectomy and left axillary clearance.

DIAGNOSIS:

Specimen confirmed the presence of a moderately-to-poorly-differentiated invasive ductal carcinoma, at least 1.5 x 1.5cm in size. The margins are all negative and contain normal breast tissue.

28 lymph nodes were harvested from the axillary clearance. 9/28 lymph nodes were involved by tumour.

Sign

Electronically signed
