

MRI report

DATE: 16 / 09 / 2018
PATIENT: Ian Makepeace
DOB: 19 July 1961

PAGE:
REF:

CLINICAL NOTES:

Unilateral right-sided hearing loss and tinnitus with associated vertigo

DIAGNOSIS:

MRI demonstrates a complex T2 enhancing mass at the right cerebellar-pontine angle appearing to arise from CNVIII. No appreciable mass effect of the cerebellum was seen. Likely to be a schwannoma arising from CN VIII.

Sign

Electronically signed
