

Ultrasound report

DATE: 12 / 05 / 2018  
PATIENT: Rebecca Pierce  
DOB: 11 Apr 1971

PAGE:  
REF:

There were two nodules seen in each lobe. R/S 12mm x 14mm x 16 mm, L/S 8mm x 8mm x 6mm. USS pattern of adenoma was seen in both nodules. On colour Doppler, "spoke-and-wheel-like" appearance was seen in both. FNA was performed in both nodules under USS guidance.

There were no hypoechoic nodules apart from the noted two. No coarse calcifications seen on the nodules, however, possibility of malignancy cannot be excluded.
