Angiogram report

DATE: 20 / 06 / 2018
PATIENT: Arthur Ryan
DOB: 08 October 1953

PAGE:
REF:

CLINICAL NOTES:

Intermittent claudication with rest pain. Left-sided ABI 0.5 and TBI 0.25.

DIAGNOSIS:

The angiogram revealed a severe stenosis in the middle third of the left superficial femoral artery. It did not appear to have good collateral blood flow.

Sign

Electronically signed
