LEARNING OUTCOMES AND SETTING PEP GOALS

Upon completion of this unit, students will be able to:

1. conduct a focused mental health assessment on people, and interpret health information and informatics in order to plan and implement safe person-centred nursing care across the life span;
2. implement and evaluate evidence-based clinical reasoning and the application of the NMBA Registered nurse standards for practice during professional education practice (PEP) to develop and consolidate skills in mental health nursing practice, including recognising and responding to patient deterioration across diverse health contexts;
3. integrate and apply principles of reflective practice and effective communication through digital health with consideration of ethical and legal principles and person-centred care;
4. develop and apply knowledge and skills associated with mental health care strategies, pharmacotherapeutics and safe use of medications; and
5. integrate preventative and health promotion strategies to mental health conditions.

SETTING GOALS

PEP goals can be viewed as a well thought out itinerary for your learning. They can give you guidance through PEP, keep you focused on the most important areas and can be used to communicate to others, such as your preceptor or Clinical Facilitator RN. They can offer information such as what you hope to achieve during your PEP and where your interests lie.

PEP goals may be prescribed (such as the competencies you need to achieve in your PEP record book and you may also develop your own. In any sense the goals should be SMART

Learning goals help you become a safe, effective, competent and confident registered nurse. Your goals will become progressively more sophisticated as you proceed through the program and each semester they will build upon and consolidate what you have already learnt.

1. Goal What do I want to learn? 3. Strategy How am I going to learn it?	2. Rational Why do I want to learn it? 4. Evidence How am I going to prove that I have achieved my objective?
